

SE 4-CYLINDER MARINE ENGINES

FACTS

- Power range: 106 - 120 kW
- Displacement: 2.1 lt
- Dry weight: 263 kg

Based on the proven and trusted 4-cylinder Monoblock concept of STEYR MOTORS, the SE 4-cylinder engine series has been further developed and especially designed for more torque at lower speed. The series is intended for installation with sterndrives, but does also allow other propulsion systems.

MAIN FEATURES

- Perfectly suited for commercial applications
- Dual circuit cooling system with corrosion resistant materials
- Excellent performance and highest durability
- Compact and lightweight design
- EPA Tier III certified and RCD compliant
- Fulfills the U.S. Coast Guard's requirements
- Different drive systems can be installed
- Sterndrive packages with Bravo One, Two and Three available
- Standard 12 V alternator, optional 24 V available
- Preparation for keel cooling and many other options & kits available

See more applications on our website or contact us for further references.

OVERALL CHARACTERISTICS

- Direct injection Diesel engines
- 4-stroke, turbocharged
- 2.1 lt displacement
- 85 mm bore, 94 mm stroke
- Dual circuit cooling / Fresh water cooling
